

## FREEDOM SERVERS

For most businesses, building, expanding and supporting the facilities that house network architecture and infrastructure can be a major financial roadblock to success.

Anchor's Freedom Server range provides you with all the flexibility and security of your own server at a price you can afford. All Freedom servers are supported by Anchor's expert team of computer engineers.

### INTENDED APPLICATIONS

Freedom servers offer an ideal solution for small and medium sized businesses of all kind. The platform is used for the deployment of mail servers, web and application servers, offsite backups and database servers.

### IMMEDIATE DEPLOYMENT

We understand how important it is for our customers to have their business requirements met and the solution deployed as soon as possible. Our promise is that from the moment we receive your authorisation form, we will have the server up and running within 24 hours.

### SERVER SPECIFICATIONS

FREEDOM SMALL	FREEDOM LARGE
3.33 GHz Celeron	Core 2 Duo 1.86 GHz
512MB RAM	1GB RAM
160GB SATA HDD	2 x 160GB SATA HDD
\$175/month	\$295/month

### UPGRADES

Memory: 512, 768 & 1GB RAM  
Storage: 120, 200, 300 & 400 GB (RAID0/RAID1)  
Reliability: Tape backup  
Security: Managed network based firewall  
Support: Monitor, Secure, Complete

### CUSTOMER SUPPORT

At Anchor, we guarantee to keep your server on line 99.8% or we start to pay you.

Our monitoring is done 24x7 and our clients have access to our support centre and help desk around the clock.

We standardise our hardware and equipment and we keep spare parts on hand for those unfortunate moments, ensuring

that any disruption is dealt with effectively and efficiently.

### DATA CENTRE INFRASTRUCTURE

Our state of the art facilities are equipped with the latest safety and security features, enabling us to guarantee 99.8% uptime of your servers. They include

- Battery backup power
- Dual diesel generators
- Redundant core network
- Multiple Internet providers
- 24 x 7 onsite facilities monitoring
- Redundant climate control cooling systems
- VESDA and Gaseous based fire protection

### SERVER BUILD & MANAGEMENT

Prior to deployment every component of your server undergoes a 5 day stress testing program to measurably reduce the risk of any possible future hardware failure.

Automated build processes enable your server to be deployed with a working initial configuration.

### SUPPORT LEVELS

You're in control, you get to select how much or how little help you need to run your server. Choose from three levels of support:

#### 1. ANCHOR MONITOR

For those customers who want to have absolute control and flexibility with regards to patching, monitoring, updating etc. We make sure your server is constantly running and we guarantee 99.8% uptime

#### 2. ANCHOR SECURE

Combined with the latest commercial release of Linux or Windows our systems administrators keep your server locked down tight with a combination of host based firewalling, IDS, continuous service level monitoring and application of the latest software updates and patches.

#### 3. ANCHOR COMPLETE

It's Anchor's complete hands off approach to server management. Eliminating the need for in-house server administration skills, we identify what it is you want to achieve and we do it for you. It's that simple.
