

Shared hosting acceptable usage policy

This acceptable usage policy is designed to make clear exactly which activities must not be engaged in whilst using services provided by Anchor Systems.

The policy will in no way restrict your activities provided you act in a considerate and law abiding manner.

1. Acceptance of changes.

Anchor may from time to time vary the Acceptable usage policy, charges and conditions outlined in this agreement. The version of this agreement that is published at www.anchor.net.au should always be taken as the binding and most recent version of these terms and conditions.

2. Maintenance.

From time to time we must take the service off-line to perform maintenance in the form of software and hardware upgrades to ensure the services continues to operate at its optimum. Maintenance will be carried out in periods of low usage to minimise disruption. All clients will be notified on their nominated contact email address in a reasonable amount of time prior to such activities.

3. Email abuse.

The act of sending unsolicited email ("spam" or "junk mail"), or allowing other parties to send such email through your account is not acceptable. Distributing, advertising or promoting software or services that have the primary purpose of encouraging or facilitating unsolicited E-mail or spam is also prohibited. Customers are also responsible for ensuring that they do not advertise or promote themselves through UBE/UCE. Upon receipt of complaints regarding such activities Anchor Systems will act to prevent such further occurrences, This may include account suspension or cancellation.

4. Forging Headers.

Forging or modifying email headers to hide or mislead your identity will not be accepted.

5. Illegal or unauthorised access.

Gaining or attempting to gain illegal access, or access without authorisation to computers, networks or accounts owned by Anchor Systems or any external party will not

be accepted. Activities related to attempts to gain access to Anchor Systems computer or equipment, or such equipment owned by other parties will not be accepted. Such activities may include (scans or other information gathering activities).

6. Copyright and intellectual property violations.

Anchor Systems will not monitor or interfere with content published on our servers unless proper notice is served advising of an infringement of copyright or intellectual property. Users of our services should at all times ensure that all information published and made accessibly to the general public is not in breach of any applicable copyright or intellectual property laws.

7. Privacy of information.

In the normal course of business Anchor Systems will not monitor, intercept or interfere with information stored or passing through our system. Clients should be aware that the Internet is not a secure place and should utilise the tools provided (encryption of data transfer including SSH, SCP) to maintain security of the information transferred through our system.
